SYNOPSIS OF PROJECT

1. Title of the Project	Cyber Fraud / Digital Scam Awareness & Assistance System
2. Names of Group Members	1. Shraddha Shinde 2. Om Pawar 3. Vaishnavi Sanap 4. Shraddha Jambukar
3. Guide	Ms. Mandhare V. S.

4. Introduction

Cyber fraud uses digital technology or the internet to deceive users and steal money, information, or account access. Online banking, UPI, social media and e-commerce have increased opportunities for digital scams. Many users cannot immediately recognize suspicious calls, messages, links or websites. The proposed Cyber Fraud/Digital Scam Awareness & Assistance System combines awareness, guidance and assistance in one easy-to-use platform. In today's digital age where UPI payments, online banking, and social media have become part of daily life, cyber fraud and digital scams are increasing rapidly. Every day thousands of people lose money to fake UPI screenshots, OTP fraud, phishing links, fake customer care numbers, and QR code scams, mainly due to lack of awareness.

5. Problem Statement

Users may find it difficult to identify fake calls, messages, links and websites. Scammers often create urgency and pressure users to act quickly. After a suspected fraud, victims may not know what information to save, what to avoid, or where to seek official help. Cyber-safety information is also scattered across different sources. In the era of Digital India, the usage of online payments, internet banking, and social media has grown exponentially, but at the same time, cyber fraud and digital scams have also increased at an alarming rate. Scams like fake UPI payment screenshots, OTP fraud, KYC update fraud, phishing links, QR code scams, and fake customer care numbers are trapping thousands of innocent people every day, leading to financial losses of crores of rupees. The main reasons behind this are lack of digital awareness, inability to identify fake messages or links, and not knowing the correct procedure to report fraud immediately.

6. Need and Necessity of Project

- Cyber fraud cases are increasing daily, causing crores of financial loss.
- Lack of digital awareness among common people, students and senior citizens.
- People cannot identify fake links, QR codes, UPI IDs and messages.
- No instant guidance after fraud – victims don't know about 1930 helpline and reporting process.
- Golden time to freeze money (1-2 hours) is wasted due to confusion.
- Fraudsters are using new advanced tricks like AI voice clone and fake apps.
- No single platform available for Awareness + Detection + Assistance.
- Necessary to make Digital India safe and build trust in online transactions.

7. Aims and Objectives

- To educate users about latest types of cyber frauds and scams.
- To detect fake links, UPI IDs, phone numbers, QR codes and messages in real-time.
- To provide instant step-by-step guidance after fraud happens.
- To help users report fraud on 1930 helpline and http://cybercrime.gov.in portal.
- To give live alerts about new trending scams.
- To make the system available in multiple languages for all citizens.
- To reduce financial loss and make digital transactions safe.

8. Methodology

Data Collection: Collect information about common cyber frauds, suspicious calls, messages, links, websites and user awareness requirements.

Survey and Analysis: Study common scam patterns, warning signs and difficulties faced by users when dealing with suspicious digital activity.

System Design: Design a centralized web-based platform for cyber-fraud awareness, guidance and assistance.

Frontend Interface: Develop an easy-to-use interface through which users can select a scam type or enter suspicious information.

Backend System: Implement a structured workflow for analysis, safety guidance and reporting assistance.

Testing: Test the system for usability, guidance accuracy and proper functioning.

Implementation: Implement the system according to the identified user requirements.

9. Social, Environmental, and Technical Issues Addressed

Social: Improves digital safety awareness and provides users with a structured way to understand and respond to cyber-fraud situations.

Environmental: Supports digital awareness resources and reduces dependence on printed awareness material.

Technical: Provides a centralized web-based system with scam checking, guidance, Al assistance, awareness resources and reporting guidance.

10. Project Plan / Schedule

Time	Planned Activity
Weeks 1–2	Research and Planning
Week 3	Identify Common Cyber Frauds and Data Sources
Week 4	Collect Scam Examples and User Requirements
Week 5	Design Awareness and Assistance Workflow
Week 6	Develop Website and Scam Checker
Week 7	Add Al Assistance and Start Testing

Weekly Project Schedule – Gantt Chart

Activity	01-Sep-2025	08-Sep-2025	15-Sep-2025	22-Sep-2025	01-Oct-2025	08-Oct-2025	15-Oct-2025	22-Oct-2025
Research and Planning	■							
Identify Common Cyber Frauds and Data Sources		■						
Collect Scam Examples and User Requirements			■					
Design Awareness and Assistance Workflow				■				
Develop Website and Scam Checker					■			
Add Al Assistance and Start Testing						■		

11. Budget

Sr. No.	Expense Head	Estimated Cost (₹)
1	Printing	100
2	Stationery (pen, paper, files)	100
3	Transport for Field Visits	250
4	Communication (calls, WhatsApp)	100
5	Miscellaneous Expenses	50
	Total Estimated Cost	**600**

12. References

1. National Cyber Crime Reporting Portal (cybercrime.gov.in) is the official government portal for reporting cyber crimes.
2. 1930 is the National Cyber Crime Helpline Number provided by Ministry of Home Affairs.
3. NCRB Report shows the yearly statistical data of increasing cyber crimes in India.
4. RBI Guidelines provide rules and safety measures for secure digital payments.
5. CERT-In issues advisories and alerts related to cyber threats and vulnerabilities in India.
